

AIR KNIFE AIRMASTERS+ 36-914MM

The compressed air knives AIRMASTERS+ have been developed for use in any situation requiring an extremely high blowing strength while at the same time guaranteeing a significant reduction in energy costs as well as in noise levels. Manufactured in Italy with precision machinery and all the know how needed, the air knives AIRMASTERS+ guarantee a uniform flow and a force that is perfectly distributed along the whole length of the knife. Lot of the air that is used is drawn from the environment with the Coanda effect with a small quantity of compressed air. We are able to generate a flow that is the equivalent of 50 times the compressed air used. This means that our air knife offers a ratio of 1:50. In fact, our exclusive and patented design enables an effective transport of surrounding air that is superior to the capacity offered by traditional air knives. AIRMASTERS+ compressed air knives are manufactured in anodised aluminium to ensure a longer durability. Our air knives integrate only stainless steel shims. AIRMASTERS+ compressed air knives are easy to assemble and maintain. Stainless steel models are available for high temperature and corrosive applications. The pieces can easily be joined to each other, thus ensuring uniformity of flow. Patented.

Blowing force at 5 Bar

30 N

Air consumption at 5 Bar

152 Nm³/h

Air Amplification

50:1

Sound level at 5 Bar

67dB(A)

Material

Aluminum coated

Shims

Stainless Steel

Dimensions

914 mm x 44.5 mm x 27.6 mm

Connection type

Female

Back connection

1/4" x 3

Side connections

1/4" x 2

Blowing pattern

Flat

Velocity at 152mm

71 m/s

Max operating pressure

10 Bar
